

SPA FROG SPA CARE GUIDE

PRESENTED BY MASTERSPAPARTS.COM

Spa FROG® products use a patented EPA approved mineral formula, Fresh Mineral Water™, along with a low dose of chlorine leaving your spa water cleaner, clearer, and softer; without the hassle of measuring out and touching chemicals.

Please keep this guide in a safe place so you can easily find it for questions that arise in the future. If you need additional help, please call our MSP Customer Service team seven days a week at 855-308-2149 or visit www.masterspaparts.com.

ABOUT YOUR SPA FROG PRODUCTS

SPA FROG IN-LINE SYSTEM

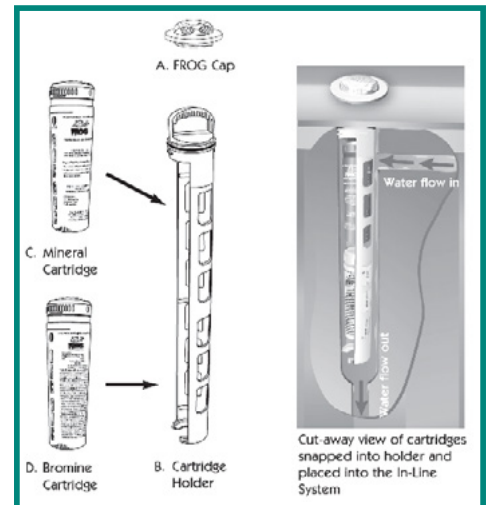

The **Spa FROG® In-Line System** is made up of:

A: FROG cap that is distinguishable among the fittings on the top of the spa.

B: Cartridge holder that pulls out of the system.

C: Mineral cartridge that helps control bacteria in water.

D: Bromine cartridge that helps support the minerals while oxidizing contaminants like body oils. The cartridges are adjustable to meet your specific spa water needs.

USING THE SPA FROG FLOATING SYSTEM

Step 1: Insert both cartridges into the green floating holder, and push them into the openings until they stay in place.

Step 2: Let the **Spa FROG® Floating System** free-float in your spa.

Step 3: When using the spa, remove the **Spa FROG® System**, drain most of the water into the spa and set on the side of the spa inverted (so all excess water drains into holder.)

REMEMBER TO REPLACE IN THE WATER WHEN FINISHED USING SPA!

BENEFITS OF SPA FROG PRODUCTS

Spa FROG® In-Line System allows you to enjoy your spa more with less work and less bromine than other spa chemicals!

You'll experience LESS WORK because:

1. FROG Mineral System continuously works to control bacteria for up to 4 MONTHS.
2. Cartridges last longer to eliminate daily maintenance.
3. Cartridges are pre-filled for no measuring or mess.
4. Simply adjust to your setting and relax for weeks.

You'll experience LESS BROMINE because:

1. With minerals in the water, bromine use is cut by up to 50%.
2. Bromine last longer: 2-4 weeks on a 350 gallon spa with average use.
3. Water feels softer & system leaves water crystal clear.
4. FROG Mineral System works with bromine.

START-UP

Step 1: Follow all directions from your spa manufacturer on filling and balancing spa water.

Step 2: Use a metal out or sequestering agent if water is high in metals. Wait 24 hours to finish setting up.

PLEASE NOTE: Before using cartridges, establish initial residual of 1.0-2.0ppm bromine or chlorine. Don't use a non-chlorine shock. Do NOT add it through the **Spa FROG® In-line System**. For best results use the Spa FROG Jump Start that quickly dissolves with a fizzing action. Use one packet per 500 gallons.

Step 3: Use Spa FROG® Brand Test Strips. Test Strips accurately maintain the bromine level following the directions carefully.

Step 4: Set Mineral and Bromine cartridges. When the spa reaches operating temperature, set cartridges according to directions and insert them into system.

REPLACING CARTRIDGES

Step 1: Open cap of Spa FROG® In-Line System. Then, set cap aside. *Note: Do not open cap while jets are on.*

Step 2: Remove holder and spent cartridges. Push down holder and turn counterclockwise before pulling out.

Push bottom out through openings in back of holder. Then grab cartridges and pull out.

Step 3: Snap in new cartridges. **Spa FROG® Mineral Cartridge** snaps into the area marked "minerals" (top), & the **Spa FROG® Bromine Cartridge** snaps into the area marked "bromine" (bottom). Line up the indentation at the top of cartridges with raised area of holder.

Step 4: Insert holder in system (slowly!) Line up holder arrow with system arrow. Push down until holder tabs go past system tabs, and turn holder right (clockwise) until it stops. You can ensure it's locked by attempting to pull the holder up. If it stays put, its secure.

THE IDEAL WATER BALANCE

TEST	IDEAL RANGE	ASSOCIATED PRODUCT
pH	7.2 - 8.2 PPM	Spa FROG® In-Line System
Total Alkalinity	80 - 150 PPM	Spa FROG® In-Line System
Calcium Hardness	150 - 250 PPM	Spa FROG® In-Line System
Chlorine	1.0 - 3.0 PPM	Spa FROG® In-Line System, Test Strips
